VOLVO

Volvo

In January 5,575 Volvo trucks were delivered, a decrease of 18% compared with the same month last year.

In Europe, deliveries decreased to 2,195 trucks as a result of low production levels in December 2012 and January 2013 and a sluggish economic environment.

January deliveries in North America decreased 50% to 788 vehicles in comparison with the same period last year. The decline in deliveries can be attributed to the adjustment of production levels, including two down-weeks in January 2013.

Deliveries in South America increased 38% to 1,437 trucks, where Brazil increased by 46% in January compared with the same month last year. The increase in industrial activity combined with favorable financing rates contributed to an uptick in the Brazilian market.

January deliveries in Asia amounted to 819 units in total, a decrease of 10% compared to the same month last year.

Total Volvo	5 575	6 822	-18%

Mack

Deliveries for Mack in January totaled 1,305 vehicles, an 18% decrease compared with January 2012. The decline was the result of an industry-wide softening in North American demand, due to which Mack began adjusting production levels in Q4 2012.

Renault Trucks

In January, 2,742 Renault trucks were delivered, a decrease of 29% compared with January 2012. The lower deliveries were mainly due to the slowing of demand in southern Europe at the end of last year, which imposed on us to reduce the pace of production as well as to lower deliveries of light duty trucks.
