CEO'S STATEMENT

It is pleasing to see that once again in 2022 as a whole, Bulten achieved the highest ever sales in its almost 150 years in business, and that in Q4 we achieved an operating margin in line with our financial target for 2024. This is a sign of strength in a time of uncertainty characterized by inflation and component shortages.

Strong Q4 shows we're on the right track

Our sales figure of SEK 1,339 million and the adjusted operating margin of 8.5% for Q4 are very positive results. They are clear signs that we are growing and taking the right measures to increase growth and profitability.

During the second half of 2022, we highlighted a number of streamlining measures. One result was that during Q4, we decided to close production in Pembroke, UK. Products with healthy margins and volumes will be moved to other existing factories, and unprofitable ones will be phased out. This will ensure better capacity utilization at these facilities. Another example is the streamlining of our distribution network. By using the higher warehousing capacity we have invested in, primarily in Poland and Germany, we can assure a more sustainable and cost-effective logistical flow. This streamlining will also entail the closure of one of our two Swedish logistics centers, which will achieve further savings. In addition to these two examples, I would also like to mention our new surface treatment plant in Poland which was completed toward the end of the quarter, and which will also help to reduce costs and rationalize production flows.

In my comments on the Q3 report, I emphasized the importance of reducing stock levels. This work will continue unabated in 2023.

Changing in an ever-turbulent world

At the beginning of 2022, we thought the year might bring a bit more stability. As it turned out, it would be yet another turbulent year. During the spring, in a very short time we closed down our Russian operation, and for much of the year our manufacturing has been adversely affected by volatile customer forecasts due to an ongoing component shortage.

Looking at the positives, customer demand has been excellent despite the unsettled global economy. Achieving annual sales of SEK 4,474 million under these circumstances is certainly something to be proud of. We have grown considerably in the electric vehicle segment, and we have won several, albeit small, strategically important contracts in sectors like consumer electronics and leisure equipment. We are therefore clearly growing in the right customer categories, and are sticking to the sales strategy we communicated at our Capital Markets Day in February. I am pleased we have succeeded in this as we have also invested a lot of energy into change projects, closures, and adaptations to an uneven production rate, combined with a focus on stock reductions and price rises. All of these measures, some of which are yet to be started, are reflected in our adjusted operating margin for the year as a whole of 6.3%.

To sum up, in 2022 we have narrowed the gap between cost increases and price rises to customers, as is evident from our operating margin for Q4. This, along with what remains a strong order book, gives us a good foundation for the year ahead. Our focus now is on continuing to grow and increase our profitability, even though we live in a time of economic instability.

Vision to be the most sustainable fastener company

In terms of sustainable development, 2022 has been a very good year. For instance, our climate goals were approved by the Science Based Targets initiative (SBTi). We also received a favourable risk assessment (ESG) from Morningstar Sustainalytics, clearly showing that we are the best-performing fastener company when it comes to sustainability.

A long history creates new opportunities

Bulten celebrates 150 years in 2023. New technology and innovations have been hallmarks of Bulten's success for more than a century. We have achieved great success during the year in terms of innovation. Perhaps the most important are our successful pilot projects with TensionCam's products for measuring and monitoring clamp loads in critical applications. Based on these, we can now begin commercialization of a new customer offering. Since the TensionCam technology clearly has great potential, we also decided to begin 2023 by becoming the majority owner of TensionCam, thereby laying the foundation for building a new business area for the future.

Finally, I would like to thank all our employees, customers and business partners for their part in Bulten's development in 2022, and for helping to create strong conditions for the year ahead.

NOTE 1 INCOME

Bulten is engaged in manufacturing and sales of fasteners. Revenues from product sales are reported at the time the control of the product is transferred to the customer. This usually takes place at the time of delivery to the customer and ownership is transferred. Bulten's customers are mainly in the automotive industry in Europe, Asia and the United States. The table below refers to income by geographic market where the customer's delivery point is located. The Group has the major of its income from customers in

Europe, but part of the sales is then exported to other markets in the rest of the world. Customers are mainly manufacturers of light vehicles but also heavy commercial vehicles and other suppliers, so-called tiers. For heavy commercial vehicles, most of the deliveries are for critical fasteners for engines. Of the total sales, the majority goes to the chassis/body. Other income refers to other industries outside the automotive industry, such as consumer electronics.
