

Zensar Technologies Shares Insight into Leveraging the Cloud for Business Transformation in New Thought Paper

Westborough, MA – July 28, 2015: [Zensar Technologies](http://www.zensar.com), a leading software and infrastructure services provider, today announced the availability of a new thought paper titled ‘Transform Your Business – Get Cloud Ready’. The paper features Gartner research and highlights the value of cloud computing services for next-generation solutions and how IT service providers can enable the most effective adoption and management of cloud models. The paper can be downloaded at: <https://info.zensar.com/GetCloudReady.html>.

Based on real-world insights from Zensar’s work with global enterprises, the thought paper provides insights on how enterprises can take advantage of a move to cloud computing as a step toward realizing next-generation solutions that incorporate cloud, social, mobile and information. The paper will share:

- Is it realistic that a move to the cloud will keep your data as secure as when it was stored in your own data center?
- Will cloud solutions optimize and enhance efficiencies across the organization and enable an improved end user experience?
- Are there customizable Hybrid Cloud solutions for organizations to merge their public and private clouds and what are the business advantages of doing this?

“As organizations continue to discover the value of the cloud to enable more flexible and agile IT environments while lowering costs, they are relying on partners to help manage their cloud migration. The self-service and on-demand nature of cloud computing has created new challenges for IT services providers, as well as opportunities to deliver innovative, next-generation solutions to clients,” said Ankit Ghosh, Senior Vice President and Head of Global IM Practices, Zensar Technologies. *“Zensar has a wealth of experience in helping our customers successfully and seamlessly execute their journey to the cloud, and we are excited to publish this report to share our knowledge and expertise,”* he said.

Zensar provides clients with Cloud Consulting, Cloud Enablement, and Cloud Management services encompassing a full portfolio of Cloud Services and Solutions including:

- **Cloud Readiness Assessment** – A solution which helps organizations determine how to evaluate, plan and build a successful cloud strategy. This is accomplished through a detailed discovery process, which gathers data on the organization’s current applications and infrastructure environment and reviews its business and technical objectives.
- **Hybrid Cloud Services** – Industry-leading technologies combined with Zensar’s tested migration methodology enables organizations to transform their existing infrastructure to a private or hybrid cloud model. This allows organizations to leverage technology benefits while lowering their total cost of operation.

- **Cloud in a Box** – An extensible appliance-based server/software stack with the ability to transform an x86 server into a cloud-enabled virtual computing platform. The Cloud in a Box provides users with visibility through a single pane of glass with hybrid cloud management capabilities including automation and orchestration.
- **Storage as a Service** - Zensar's Storage as a Service (STaaS) provides storage with enterprise class features and fully managed services without investing in traditional expensive SAN/NAS equipment. The offering includes options for private and public cloud with on premise or hosted scenarios.
