## Peab builds school in Löddeköpinge

**Peab has been commissioned to build a school for pre-school and grades 1-9 in Löddeköpinge, Kävlinge Municipality. The customer is KKL Fastigheter AB and the contract is worth SEK 290 million.**

The project is divided into two stages where the first stage was contracted in the fall of 2019 and entailed designing, planning and calculation. A new contract has now been signed for the second stage which is the production phase.

The school will be located in the northeastern part of Löddeköpinge and will consist of four buildings linked by passageways. There will be three school buildings for 630 students and a gym with two sports halls for a total of 13,000 m<sup>2</sup>.

The school buildings will be two stories and all the buildings will meet the prerequisites for Miljöbyggnad Silver. There will be solar panels on the roofs of the buildings and they will be supplied by a geothermal plant.

The buildings will be used by the school as well as the municipality for community activities. The domestic science classrooms will be used for cooking classes, music clubs will use the music rooms and the gym will be used for sports and other activities.

“This project is an important investment in the future for residents of Löddeköpinge and we’re proud to contribute with our know-how. The school will be meeting place for both students and personnel as well as the community, and it will contribute to inhabitants’ health and meaningful leisure activities. In other words, it’s a great example of our locally produced community building,” says Bratislav Marjanovic, Region Manager Peab.

“We look forward to a good partnership. By investing in Löddeköpinge and Hofterup we are actively contributing to growth in the community. This is right in line with our role as the local Community Builder where we create top modern and inspirational school environments that help the municipality to attract residents and the best competence in education,” says Mikael Strand, MD of KKL B.

The project is a turnkey contract in partnering and the construction is expected to be completed in the fall of 2023.

The project will be order registered in the second quarter 2021.
