Peab builds new shopping center in Åkersberga

Peab has been commissioned to build a new shopping center, Maxi ICA Stormarknad, in Åkersberga north of Stockholm. The customer is Fastica Åkersberga AB and the contract is worth SEK 180 million.

The project comprises new construction of a shopping center for Ica with the accompanying groundwork and parking as well as demolition of the existing building on the property. The new building will be a wooden structure with a sedum roof and solar panels. In addition, Peab will do the preparatory work for future construction of a three story office building. The building will be certified according to Miljöbyggnad, level Gold.

“As a community builder we’re happy we can simplify life for people living in Åkersberga. It’s important to meet the growing need for service so we look forward to being part of building Maxi ICA,” says Lars Enroth, Region Manager Peab.

The project is a turnkey contract. Construction is expected to be completed in March 2023.

The project will be order registered in the second quarter 2021.
