## Peab is entrusted with an extension of road operation and maintenance

**Five of Peab's operation contracts for road maintenance with the Swedish Transport Administration have been extended through the exercise of two-year options. The contracts have a total value of approximately SEK 660 million.**

Peab has been commissioned by the Swedish Transport Administration to maintain the Swedish network of roads in a number of operation areas. Two-year options have now been exercised in five of 19 in total ongoing construction contracts. These contracts are for the operation and maintenance of road networks in the operation areas Borlänge, Östra Värmland, Öland, Västbo and Lit. The option period for all five construction contracts is two years, which means that they now run through the autumn of 2028.

"We're very pleased to be able to continue to take care of the roads in these five operation areas for another two years. Being part of ensuring that we have safe and passable roads in Sweden is an important task for us as a community builder and something we're very proud of," says Berth Larsson, Region Manager Operation and Maintenance at Peab.

The extended contracts were order registered in the third quarter 2025.
