CTT Systems Announces First Cair™ VIP Order for BBJ MAX 8

CTT SYSTEMS AB ("CTT"), the market leader of aircraft humidity control systems, announces launch customer order for a Cair™ VIP Inflight Humidification system from Jet Aviation for one Boeing BBJ MAX 8. This completion will feature increased humidity in the entire aircraft cabin which requires support from three humidifiers. This award is CTT Systems' 86th VIP order for Airbus ACJs/Boeing BBJs.

"We look forward to work with Jet Aviation as launch customer on BBJ MAX 8," says Peter Landquist, Vice President Sales & Marketing of CTT Systems. "We are committed to improve our inflight humidification system even further."

"Humidification is an important well-being feature in our most prestigious VIP completions," said Christoph Fondalinski, director of Project Management at the Jet Aviation Basel Completions Center. "We have broad experience working with CTT and are pleased to once again incorporate their reliable and efficient systems for the benefit of our customer."

CTT's humidifier maintains air humidity in the human comfort zone of approx. 20 percent Relative Humidity. A higher humidity on long-haul flights reduces dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases) and improves wellbeing and sleep. The humidifier is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria. The Cair™ VIP IFH system offers total anti-condensation protection.

Established in Basel, Switzerland in 1967, Jet Aviation is one of the leading business aviation services companies in the world. The company provides maintenance, completions and refurbishment, FBO and fuel services, along with aircraft management, charter and staffing services from some 30 airport facilities throughout Europe, the Middle East, Asia, North America and the Caribbean.

About CTT SYSTEMS

CTT Systems is the market leading provider of humidity control products in aircraft, including moisture control systems to prevent fuselage condensation, and inflight humidifiers for crew and passenger well-being. All products are available for retrofit installations and line-fit on Airbus A380, A350, Boeing 787 and 777X. The crew humidifier is standard equipment in a crew rest compartment on Boeing 787 and standalone option in the crew rest compartment on A380, A350XWB and B777X. The flight deck humidifier is SFE listed on Airbus A350XWB, Boeing 787 and Boeing 777X. Cair™ inflight humidification (IFH) is SFE listed for First/Business Class on A350XWB (Zone 1-3) and Boeing 777X (Zone 1 and 2). The Zonal Drying™ system is basic equipment in all Boeing 787s and optional for the Boeing Next-Generation 737-800 and Airbus A350. Also visit: www.ctt.se
