CTT Systems Announces Boeing BBJMAX9 VIP Inflight Humidification Order from AMAC Aerospace

CTT SYSTEMS AB ("CTT"), the market leader of aircraft humidity control systems, announces Inflight Humidification VIP system order from AMAC Aerospace for a Boeing BBJMAX9 aircraft. This completion will feature increased humidity in the entire aircraft cabin, which requires support from three humidifiers, with Anti-Fuselage-Condensation protection. The system will be delivered to AMAC in Q4 2020. This award is CTT Systems' 95th Inflight Humidification VIP order for Airbus ACJ and Boeing BBJ aircraft.

"We are delighted to work with AMAC Aerospace again in the completion of the first BBJMAX9 that AMAC equip with our IFH system," says Peter Landquist, Vice President Sales & Marketing at CTT Systems.

"AMAC Aerospace are very pleased to work with CTT in another VIP completion project. Cabin humidification is a common request from our VIP clients that value good health, wellbeing and feeling at ease during and after flight," comments Tracey Hawthorne-Kurz, Director Logistics & Purchasing at AMAC Aerospace Switzerland.

Without an efficient humidification system, the VIP cabin air is far more dehydrating than any place on Earth - below 5 % Relative Humidity (RH). This BBJMAX9 will have a striking humidity increase, restored to comfort and wellbeing level, to approx. 20 % RH. VIP passengers on this BBJMAX9 will on long-haul flights benefit from reduced dry air related problems (e.g. fatigue, jet-lag, red eyes, dry throat, dry skin, spread of virus diseases) and improved wellbeing and general sleep. The CTT humidifier is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria. The CTT IFH VIP system offers total anti-condensation protection.

About AMAC

AMAC Aerospace is offering narrow and wide-body VIP Completion and Maintenance for the corporate/private aviation market. The company was founded in 2007 in Basel, Switzerland. Today the company is the largest privately-owned facility in the world and led by Kadri Muhiddin, Executive Chairman/Group CEO, Bernd Schramm, Group COO and Mauro Grossi, Group CFO. The successful progress attests to the commitment to excellence. With long-term industry engagement, deep industry roots, extensive experience and strong international network, the AMAC team collaborates to exceed the expectations of clients, airworthiness authorities and original equipment manufacturers. www.amacaerospace.com

About CTT SYSTEMS

CTT Systems is the market leading provider of humidity control products in aircraft, including Moisture Control Systems to prevent fuselage condensation, and inflight humidifiers – Humidifier On-board - for crew and passenger well-being. All products are available for retrofit installations and line-fit on Airbus A380, A350, Boeing 787 and 777X. The crew humidifier is standard equipment in a crew rest compartment on Boeing 787 and standalone option in the crew rest compartment on A380, A350XWB and B777X. The flight deck humidifier is SFE listed on Airbus A350XWB, Boeing 787 and Boeing 777X. Inflight Humidification (IFH) – Humidifier On-board - is SFE listed for First/Business Class on A350XWB (Zone 1-3) and Boeing 777X (Zone 1 and 2). The Moisture Control Anti-Fuselage-Condensation system is optional for the A320 Family and Boeing Next-Generation 737-800 as well as Airbus A350. Also visit: www.ctt.se
