

Press release

250,000 drawings made available when Addnode Group's subsidiary Cad-Q will take care of Riksbyggen's digital drawing archive

STOCKHOLM, October 15, 2015 – CAD-Q has signed an agreement with Riksbyggen for the construction and operation of Riksbyggen's digital drawing archives. Riksbyggen currently has nearly 250,000 drawings in the archives and the number is growing every day.

In order for Riksbyggen to get better and easier access to mission critical and important information they have chosen CAD-Qs Archive Service with the product HyperDoc. CAD-Q will take over the daily administrative management of drawings and models, and the system HyperDoc will allow users, via mobile devices and the web, to reach and use all the property information in their daily work.

"We are really looking forward to even better manage our extensive archives and to have a tool that every employee, and not least our customers, can manage in a simple way," says Göran Danling business developer at Riksbyggen.

"We are proud that our products and services once again have been chosen by a large and demanding Facility Manager. Today we manage drawings and models for property owners representing almost 100 million square meters of building area, mainly in Sweden and Norway," says Rolf Kjaernsli, President Addnode Design Management.
