

## PRESS RELEASE

### Latour invests in NOAQ Flood Protection AB

Investment AB Latour (publ) has, through its subsidiary Latour Future Solutions AB, invested in NOAQ Flood Protection AB ("NOAQ").

NOAQ manufactures mobile flood barriers that enable rapid and cost-effective protection against flooding. The company's market-leading technology utilizes the weight of the floodwater itself to create stability, making the barriers both easy to handle and highly effective. The products are exported globally to public and private customers within civil defense, property protection, and infrastructure.

NOAQ was founded, in its current form, in Näsvisken in 2013 and has 14 employees. The company has an international market presence with around forty distributors that have delivered solutions to approximately fifty countries.

"Climate change is leading to an increased frequency of extreme weather events and flooding. NOAQ's solutions make a concrete contribution to climate adaptation and the protection of communities worldwide," says Pelle Mattisson, CEO of Latour Future Solutions AB.

"With Latour as a long-term industrial partner, we gain strategic support to scale our operations, broaden our product portfolio, and expand our global presence," say Sigurd Melin and Douglas Hellström, Founder and CEO of NOAQ, respectively.

The investment means that Latour Future Solutions AB will acquire a minority ownership of approximately 20 percent of the company.
