

HANZA establishes manufacturing solution with deliveries to Flexenclosure

HANZA Holding AB (publ) has established a manufacturing solution for eSite intelligent power management systems for the leading off-grid energy provider [Flexenclosure](#), under which HANZA will supply electrical parts.

Flexenclosure provides sustainable Internet infrastructure for emerging markets – designing and manufacturing [eCentre](#) prefabricated data centre buildings and [eSite](#) intelligent power management systems for the ICT industry. The company recently launched eSite x10 – the world's first hybrid power system purpose-built for outdoor telecom sites and to outdoor telecom standards.

HANZA has signed an agreement with Flexenclosure, whereby HANZA will supply electrical parts from their manufacturing cluster in Årjäng, Sweden and host a final JIT (Just in time) assembly line.

"Our new eSite x10 product is the future of hybrid power, said David King, CEO, Flexenclosure. "Its hardware and software engineering is pre-eminent in our industry and we needed to be sure that our manufacturing partner was pre-eminent in theirs. We're comfortable that with their high-tech experience and their proximity to our manufacturing hub in Sweden, HANZA is the ideal partner."

"Our concept is designed to deliver high customer value thru CAP (Competence, Automation and Proximity) to customers in countries like Sweden," said Thomas Lindström, Senior Vice President, Head of Business Solutions HANZA. "This we combine with our unique advisory services and complete manufacturing to develop a sustainable manufacturing strategy for our customers".
