

# UROS announces opening of new office in Shenzhen, emphasises focus on IoT activities

- *The Shenzhen office in Mainland China will act as a new IoT hub for UROS GROUP*
- *Marks the second office opening in Asia within the past year*

**10th September, 2018 - Shenzhen, China.** [UROS](#), a leading innovator in IoT solutions and global connectivity today opened a new office in Shenzhen, China.

The new location at Shenzhen Qianhai Free Trade Zone will take on a central role in the company's current and upcoming operations in China, and will house UROS' new subsidiary Shenzhen UROS IoT Technology Company Limited.

*"With the majority of IoT activity in China taking place in the innovation centric city of Shenzhen, it was a logical next step in UROS' expanded presence in Asia. Also taking into consideration Shenzhen's heritage in the manufacturing business, its talent base, technological know-how and its proximity to many important customers and strategic partners, it is a perfect IoT hub for UROS in China, but also on a global level",* said CEO Jerry Raatikainen.

This is the second office UROS opens in Asia within a year's time. Last October UROS began operations in Hong Kong at a location in the Kowloon business district.
