

## UROS launches digital eSIM service 'GOODSPEED' on iPhone and iPad

**April 26th, 2021 - Atlanta.** UROS announces digital eSIM support is now available on iPhone. UROS users can activate an additional cellular plan on iPhone, including the elegantly designed and powerful iPhone 12 lineup, advanced iPhone 11 lineup, and affordable iPhone SE, making it easy to use separate voice and data plans on one device.

UROS is also announcing support of eSIM available across all Wi-Fi + Cellular models of iPad, including the powerful new iPad Pro with 5G, featuring the breakthrough Apple-designed M1 chip for a massive leap in performance, an all-new 12MP Ultra Wide front camera for Center Stage, and advanced display technologies for an unmatched viewing experience to customers. Customers can stay connected on-the-go with global data plans. Connecting to a data plan right from iPad, anywhere in the world, is quick and easy with eSIM as customers can simply use UROS's GOODSPEED app to activate a data plan.

UROS Group CEO **Jerry Raatikainen** says: *"We are excited to be launching our eSIM services on iPhone and iPad. With this new version of GOODSPEED, there's more flexibility and versatility for customers to use their favorite Apple devices in a way that fits their unique needs, wherever their travels take them."*

[GOODSPEED](#) will be available to download in the AppStore in May.
