Ellevio extends agreement with Rejlers

Ellevio renews its vote of confidence in Rejlers' ability to deliver the Quant TP SELMA system, a quality system for electricity grid and trading companies. The system imposes exacting demands regarding security and enables Ellevio to deliver a high-quality service to its customers.

Rejlers Embriq has been providing metering and settlement services to Ellevio AB for many years via the Quant TP SELMA system. Ellevio has now decided to extend the agreement concerning Quant TP SELMA. The system quality-assures, structures and reports readings to market players where there are demanding requirements regarding security classification.

"We like Rejlers solution-oriented approach. The extension to the agreement will enable us to continue to work with Rejlers Embriq to offer our customers high-quality services," says Mårten Granfors, Head of Metering and Settlement at Ellevio.

About Ellevio:

Ellevio AB is one of Sweden's largest electricity grid companies. We make sure electricity reaches almost 960,000 homes and workplaces from Halland in the south to Hälsingland in the north, and from Smögen in the west to Stockholm and Nynäshamn in the east. We have around 500 employees and employ a total of around 3,000 people across the country. Ellevio, which has its registered office in Stockholm, is owned by the Third Swedish National Pension Fund, Folksam, the First Swedish National Pension Fund and OMERS Infrastructure.
