Statnett signs agreement with an alliance in which Rejlers Embriq is included

Statnett has signed an agreement with a supply group of which Rejlers Embriq is a member. The agreement concerns the development and management of system solutions. Rejlers Embriq has been providing similar services to Statnett since 2016.

Balancing of the Nordic power system

“We are very pleased to be participating in this delivery to Statnett,” said Ritu Rampal, Director of Consulting at Rejlers Embriq AS. “We have been providing similar services to Statnett since 2016, and our highly capable developers and testers have helped Statnett with projects such as “fifty”, which is an important initiative to ensure the balancing of the Nordic power system,” says Rampal.

Elhub

“Going forward and as part of the new agreement, our consultants will also help Statnett on projects linked to Elhub, amongst other things,” said Rampal. Elhub is a central IT system which supports and streamlines market processes such as sales of electrical power, relocation, termination, etc. on the Norwegian power market. It also supports the distribution and aggregation of meter readings for all consumption and generation in Norway.

About the agreement

The agreement is between Statnett and Bouvet Norge AS, the prime supplier. Rejlers is part of a group of suppliers which are acting as subcontractors to Bouvet through this agreement. The agreement will have a duration of up to six years and is expected to be worth between NOK 1200 and 1500 million.

“This is a large and important agreement for Bouvet, which again shows our competitiveness. We feel very proud and humble to have been given this vote of confidence by Statnett, and look forward to continuing our very successful partnership,” said Sverre Hurum, CEO of Bouvet.

“We have considerable breadth in our competence, with several areas of delivery towards Statnett. It is very nice to be able to contribute with this type of competence to Statnett going forward, says Thomas Pettersen, CEO of Rejlers in Norway.

About Statnett

Statnett SF is system operator for the Norwegian power system. This encompasses the development and operation of high-voltage lines and transformer stations. Statnett SF operates around 11,000km of high-voltage lines and 150 transformer stations, and is also responsible for power connections to Sweden, Finland, Russia, Denmark and the Netherlands. Statnett SF has approximately 1,300 employees and has offices throughout the country. Operations are monitored by a national control centre and two regional centres.

About Bouvet

Bouvet is a Scandinavian consultancy firm which designs, develops, manages and advises on IT solutions and digital communications. Bouvet has approximately 1,400 employees and is listed on Oslo Stock Exchange.

About Rejlers

Rejlers Embriq AS and Rejlers Embriq AB are part of Rejlers’ Norwegian operations, along with Rejlers Engineering AS and Rejlers Elsikkerhet AS. Rejlers is one of the Nordic region’s leading engineering consultancy firms. Using our vision of “Home of the Learning minds” as a benchmark, we strive to create a platform for continuous learning, development and growth. Increased learning which generates added value for both customers and employees alike. We have nearly 2,000 dedicated experts with cutting-edge expertise in technology areas such as energy, industry, infrastructure, real estate and telecom. We are close to our customers and have 70 offices across Sweden, Finland and Norway. Rejlers recorded sales of SEK 2.4 billion in 2018, and its class B share is listed on Nasdaq Stockholm.
