

Press Release, 24 March 2021

E.ON signs framework agreement with Rejlers

Rejlers has signed a broad framework agreement with E.ON regarding technical consulting services. The agreement means that Rejlers will deepen its collaboration with E.ON and continue to support the company in its efforts to create sustainable energy solutions. The agreement runs for three years with the possibility of an extension for an additional year.

Rejlers has signed a framework agreement with E.ON Sverige AB and E.ON Energidistribution AB. The agreement covers technical consulting services in all of Rejlers' areas of expertise, including project management, construction and civil engineering works, documentation, electric power, IT, measurement, HSE, regulations, permits and production-related services. The agreement applies during the period of 2021 to 2023, with a one-year extension option.

"We look forward to continuing our great collaboration in several technical areas while broadening our perspectives and gaining the opportunity to further contribute to E.ON's development and the energy transformation of society," says Jonas Böös, Business Development Manager at Rejlers.

With its roots in energy and power systems, Rejlers has acquired extensive expertise in the field and can offer a holistic perspective with a focus on innovative energy solutions. E.ON delivers electricity, heat and smart energy solutions to approx. 1 million private and corporate customers throughout Sweden. The company's goal is to transition to 100 percent renewable and recycled energy by 2025 and Rejlers is now helping E.ON in its efforts to achieve its goals.
