## Rejlers signs framework agreement with FMV

**Rejlers has signed a framework agreement with FMV (the Swedish Defence Materiel Administration) regarding support and expertise in connection to the supply of fixed and mobile power systems. The framework agreement runs for two years with the possibility of an extension for another two years. The Swedish Armed Forces can also call-off on the agreement.**

FMV procures, develops and delivers materiel and services to the Swedish Armed Forces. Rejlers has extensive experience in supporting FMV with expertise in several areas of technology. The recently signed framework agreement includes expertise in system work, technical support regarding distribution and electrical safety. The agreement gives FMV and the Swedish Armed Forces the opportunity to call-off on services like analyses, technical investigations, training and design documentation. The agreement entails an in-depth collaboration between Rejlers and FMV, where an important parameter for the customer is increased security regarding the power supply.

- We are proud to be an important partner to FMV. The framework agreement gives us a clear mission to contribute with our solid knowledge bank in defence and security, says Niklas Siljeblad, Head of Division Communication & Security at Rejlers.
