

Press release 27 February 2026

Rejlers acquires SGM Consulting in Finland

Rejlers has acquired SGM Consulting, one of the leading providers of measurement and geotechnical investigation services in Finland. The acquisition strengthens Rejlers position as a comprehensive end-to-end service provider in the Finnish infrastructure sector.

Through the acquisition, Rejlers expands its service offering into the early stages of project development, strengthening its position across the full project lifecycle. The acquisition supports Rejlers' growth strategy and strengthens its capacity to create long-term value in the built environment, while contributing to the transition towards a more sustainable society.

SGM Consulting is a leading provider of measurement and geotechnical investigation services. The company delivers base data surveys, geotechnical and environmental investigations, quality assurance and laboratory analyses for infrastructure and construction projects. Serving both public and private sector clients, SGM Consulting employs approximately 50 specialists and generates annual sales of approximately EUR 7 million, with good profitability.

"Together with SGM Consulting, we are strengthening our offering in strategically important infrastructure areas and reinforcing our position as a long-term and trusted partner to our clients throughout the entire project lifecycle. We are also very pleased to welcome a strong team of highly competent employees who will further enhance our expertise and capacity," says Mikko Vaahersalo, CEO of Rejlers Finland.

"The new ownership significantly strengthens our combined growth. Rejlers' resources and broader service offering enable us to take on more complex and diverse projects while opening up new market opportunities. For our clients, this means a more comprehensive service offering," says Mika Jääskeläinen, CEO of SGM Consulting.

SGM Consulting will be part of Rejlers Finland's Infrastructure division. The company will be consolidated as of 1 March 2026.
