Nexam Chemical publish newsletter

Nexam Chemical has published a newsletter, in Swedish, on the company website www.nexamchemical.com.

The aim of the newsletter is to provide a picture of the company and its daily business as well as the technology, the customers and the market in which Nexam Chemical operates. An English version of the newsletter will be published on the website during next week.

The next issue of the newsletter will be published in January 2017.

Note: This news has been translated from Swedish. The Swedish text shall govern for all purposes and prevail in case of any discrepancy with the English version.

About Nexam Chemical

Nexam Chemical develops technology and products that make it possible to significantly improve the production process and properties of most types of plastics in a cost-effective manner and with retained production technology. The improved properties include strength, toughness, temperature and chemical resistance as well as service life. The improvements in properties that can be achieved by using Nexam Chemical's technology make it possible to replace metals and other heavier or more expensive materials with plastics in a number of applications. In applications where plastic is already used, Nexam Chemicals products can improve the manufacturing process, reducing material use and enable more environmental friendly alternatives. Example of commercial applications: pipe manufacturing, foam production and high-performance plastics. More information about the business will be found on www.nexamchemical.com. The company's Certified Adviser is FNCA Sweden AB.
