## Nexam Chemical participates in the conference “Performance Polyamides 2017” in Pittsburgh

The conference “Performance Polyamides 2017” will be held in Pittsburgh, US, on November 14 and 15. Focus of the conference is on trends and technical developments in the polyamides industry.

This is the first North American edition of the Performance Polyamides and the event will, during two days, examine the latest polyamide resins advances for demanding applications in markets such as the automotive, electrical/electronic, medical, consumer goods, construction and industrial sectors. The participants represent all parts of the polyamide supply chain. Nexam Chemical will be represented by Dane Momcilovic, who will also hold a presentation with the title “Novel technology for polyamides modification using selective reactive elements”.

### **About Nexam Chemical**

*Nexam Chemical develops technology and products that make it possible to significantly improve the production process and properties of most types of plastics in a cost-effective manner and with retained production technology. The improved properties include strength, toughness, temperature and chemical resistance as well as service life. The improvements in properties that can be achieved by using Nexam Chemical's technology make it possible to replace metals and other heavier or more expensive materials with plastics in a number of applications. In applications where plastic is already used, Nexam Chemicals products can improve the manufacturing process, reducing material use and enable more environmental friendly alternatives. Example of commercial applications: pipe manufacturing, foam production and high-performance plastics. More information about the business will be found on [www.nexamchemical.com](http://www.nexamchemical.com). The company's Certified Adviser is FNCA Sweden AB.*
