High Performance, biggest order so far from China

Nexam Chemical has received an order from China of approximately SEK 1.3 million in the High Performance segment. The order comes from Nexam Chemical's distributor in China and is the result of successful collaboration with the customer during the year. The product to which the order applies is used in the segment of high temperature composites and will be resold to a number of customers in the country.

“We see China as an increasingly important market for us. For a long time the country was an area where we only purchased raw materials, but over the last 2 years this has changed at a rapid rate. China is now an expansive market for us, where we see great future opportunities in several of our segments”, says Lars Öhrn, CMO for Nexam Chemical, just returned from Shanghai.

About Nexam Chemical

Nexam Chemical develops technology and products that make it possible to significantly improve the production process and properties of most types of plastics in a cost-effective manner and with retained production technology. The improved properties include strength, toughness, temperature and chemical resistance as well as service life. The improvements in properties that can be achieved by using Nexam Chemical's technology make it possible to replace metals and other heavier or more expensive materials with plastics in a number of applications. In applications where plastic is already used, Nexam Chemicals products can improve the manufacturing process, reducing material use and enable more environmental friendly alternatives. Example of commercial applications: pipe manufacturing, foam production and high-performance plastics. More information about the business will be found on www.nexamchemical.com. The company's Certified Adviser is FNCA Sweden AB. FNCA Sweden AB can be reached at info@fnca.se or by phone +46-8 528 00 399.
