

Press release

Lomma 2023-01-25

Nexam Chemical has received an order from an already existing customer with a value amounting to approximately SEK 8 million for NEXIMID®.

The company located in the USA has been a regular customer to Nexam for a longer time. They have now placed a call off order for 2023. NEXIMID® can be used to manufacture polyimide resin, which is an essential component in temperature resistant composites. Composites containing NEXIMID® is used in environments where extensive material stress and high temperature put extreme requirements on the material. The application area is mainly within advanced aircraft, space and other areas where the performance requirements on the materials are the highest.

"The order shows that this area is still very interesting for us. This area is the original foundation of Nexam's technology and is still an important part. It shows the technical potential that exists in our company. We are a player in the most advanced materials available in the polymer field. The company was one of Nexam's first customers. This is the largest order we have received from them so far. The fact that they are still ordering and have gradually increased the volume is very gratifying." says Johan Arvidsson, CEO of Nexam Chemical.

About Nexam Chemical

Nexam Chemical develops technology and products that make it possible to significantly improve the production process and properties of most types of plastics in a cost-effective manner and with retained production technology. The improved properties include strength, toughness, temperature and chemical resistance as well as service life. The improvements in properties that can be achieved by using Nexam Chemical's technology make it possible to replace metals and other heavier or more expensive materials with plastics in a number of applications. In applications where plastic is already used, Nexam Chemicals products can improve the manufacturing process, reducing material use and enable more environmental friendly alternatives. Example of commercial applications: pipe manufacturing, foam production and high-performance plastics. More information about the business will be found on www.nexamchemical.com. The company's Certified Adviser is FNCA Sweden AB. FNCA Sweden AB can be reached at info@fnca.se or by phone +46-8 528 00 399.
