About Nexam Chemical

Nexam Chemical develops technologies and products that enable significant, cost-effective improvements to the production processes and properties of most types of plastics while retaining existing production technology. These improvements include greater strength, toughness, temperature and chemical resistance, and service life. The properties achieved through Nexam Chemical's technology can enable plastics to replace metals and other heavier or more expensive materials in a range of applications. In applications where plastics are already used, Nexam Chemical's products can improve the manufacturing process, reduce material use and enable more environmentally friendly alternatives. Commercial applications include pipe manufacturing, foam production and high-performance plastics. More information about the company is available at www.nexamchemical.com.
