

Press release
Lund 2014-09-19

Japanese customer has started the commercialization of a material for film production based on Nexam Chemicals crosslinkers.

Nexam Chemical has received notice from JVP, a Japanese company specializing in materials for components in the area of "photovoltaics" *, that they have started the commercialization of a material containing a Nexam Chemical cross-linker within the product portfolio NEXIMID®. Upscaling is in its final phase, and production will start in the 2nd quarter of 2015.

The sales value of Nexam Chemicals product for this application in 2015 is estimated at over SEK one million and nearly SEK two million in 2016. The volume is expected to increase over the coming years thereafter.

"Although this specific application has a limited economic value, it is a further confirmation that Nexam Chemicals' products are being established in the field of electronics", says Per Palmqvist Morin, CEO of Nexam Chemical.
