## Nexam Chemical publishes the white paper – Empowering Polyimides

Nexam Chemical has, in collaboration with Evonik Jayhawk, authored a white paper based on the webinar Empowering Polyimides, held in July 2015. The webinar was given by Dr. Carlos Solano, Nexam Chemical and Dr. Jeff Dimmit, Evonik Jayhawk. The [white paper](#) and a recording of the [webinar](#) have been published on Nexam Chemicals website.

**About Nexam Chemical**

*Nexam Chemical develops technology and products that make it possible to significantly improve the production process and properties of most types of plastics in a cost-effective manner and with retained production technology. The improved properties include strength, toughness, temperature and chemical resistance as well as service life. The improvements in properties that can be achieved by using Nexam Chemical's technology make it possible to replace metals and other heavier or more expensive materials with plastics in a number of applications. In applications where plastic is already used, Nexam Chemicals products can improve the manufacturing process, reducing material use and enable more environmental friendly alternatives. Example of commercial applications: pipe manufacturing, foam production and high-performance plastics. More information about the business will be found on [www.nexamchemical.com](http://www.nexamchemical.com). The company's Certified Adviser is Remium Nordic AB.*
