Nexam Chemical's products in the trade magazine Compounding World

The trade magazine Compounding World, include Nexam Chemical's products in an article about how additives can enhance polyamides performance.

The article "Adding performance to PA", in the latest issue of Compounding World, discusses how new additives and technologies can allow polyamides to take on even more challenging requirements. The article presents Nexam Chemicals products and how these can enhance the properties of polyamides. The article can be found in [Compounding Worlds](#) February edition (page 19-26).

About Nexam Chemical

Nexam Chemical develops technology and products that make it possible to significantly improve the production process and properties of most types of plastics in a cost-effective manner and with retained production technology. The improved properties include strength, toughness, temperature and chemical resistance as well as service life. The improvements in properties that can be achieved by using Nexam Chemical's technology make it possible to replace metals and other heavier or more expensive materials with plastics in a number of applications. In applications where plastic is already used, Nexam Chemicals products can improve the manufacturing process, reducing material use and enable more environmental friendly alternatives. Example of commercial applications: pipe manufacturing, foam production and high-performance plastics. More information about the business will be found on www.nexamchemical.com. The company's Certified Adviser is Remium Nordic AB.
