

## NEWS RELEASE

NeuroVive Pharmaceutical AB (publ)  
556595-6538

8 December, 2014

---

### NeuroVive employs a Clinical Trial Manager

*NeuroVive Pharmaceutical AB (publ) has recruited Gunilla Lindgren to the position as Clinical Trial Manager. The recruitment enables NeuroVive to ensure the sustained high quality and efficient operations of its ongoing and future clinical trials as it continues to expand. Gunilla Lindgren has solid experience of similar positions with an international focus at Astra Zeneca and Quintiles.*

NeuroVive is currently in a strong growth phase with several international clinical studies and promising drug candidates in pre-clinical development. This means that the company expects the high level of activity in clinical trials to continue over the coming years. Accordingly, NeuroVive's management has decided to recruit Gunilla Lindgren to the position as clinical trial manager. Gunilla will be responsible for ensuring the efficiency and high quality of clinical trials within the timeframes and budgets of NeuroVive's projects.

Gunilla Lindgren has solid experience of similar positions in leading international pharmaceutical companies such as Astra Zeneca and Quintiles. She will take up her position on 21 December 2014.

"This recruitment enables NeuroVive to continue its current expansion phase and to ensure the high quality of its current and future clinical trials. Gunilla Lindgren's experience from major international companies will be extremely valuable in this process, and I'm delighted to welcome her to NeuroVive," commented Jan Nilsson, NeuroVive's COO.

"It's exciting and challenging to be participating in running even more effective and scalable clinical trials in an innovative and expansive company like NeuroVive. I think I'll fit in well in this process, as I'll be able to combine my experience of larger companies with NeuroVive's strong drive," commented Gunilla Lindgren.

#### **About NeuroVive Pharmaceutical**

NeuroVive Pharmaceutical AB (publ), a leading mitochondrial medicine company, is developing a portfolio of products to treat acute cardiovascular and neurological conditions through mitochondrial protection. These medical conditions are characterized by a pressing medical need and have no approved pharmaceutical treatment options at present. NeuroVive's products CicloMulsion® (heart attack) and NeuroSTAT® (traumatic brain injury) are currently being evaluated in phase III and phase II studies, respectively. NeuroVive's research programs also include products for the treatment of brain cell injury in stroke patients, and drug candidates for cellular protection and treating mitochondria-related energy regulation diseases. NeuroVive's shares are listed on NASDAQ OMX, Stockholm, Sweden.
