

HyperX lancerer ny Savage SSD

- *Ny Quad-core, otte-kanals Phison S10 controller*
- *Fantastiske læse/skrive hastigheder og IOPS*
- *Flot rødt HyperX design*

27. April, 2015 – [HyperX®](#), en afdeling af [Kingston Technology Company, Inc.](#), verdens førende indenfor hukommelsesprodukter, lancerede i dag [HyperX Savage](#), deres seneste SATA3 (6Gb/s) SSD. HyperX Savage benytter den nye [Phison S10](#) quad-core og otte kanal controller der kan levere fantastiske læse/skrive hastigheder med både komprimerbar og ikke komprimerbar data. Dertil klarer den meget høje IOPS. Savage erstatter den succesfulde [HyperX 3K SSD](#).

HyperX Savage er den hurtigste SATA baserede SSD i HyperX sortiment. Drevet leverer sekventielle hastigheder op til 560MB/sek (læs) og 530MB/sek (skriv) og IOPS op til hele 100.000 (læs) og 89.000 (skriv). HyperX Savage leverer derved høj ydelse, ubesværet multitasking og et generelt hurtigere system. Drevet er udført i rødt stål og aluminium og har en lav profil så det passer ind i de fleste notebooks, desktops og small form factor systemer. Dette nye design er en del af HyperX trend mod mere stilfulde og markante gaming produkter.

“We are proud to introduce the HyperX Savage as our latest and fastest SATA-based SSD,” udtalte Tony Hollingsbee, Business Manager, SSD. “The HyperX 3K drive has been a core part of our SSD offerings since 2012, and now with Savage, we are unleashing even higher performance and capacities to satisfy the most demanding consumers, enthusiasts and gamers.”

HyperX Savage er tilgængelig i 120GB, 240GB, 480GB og 960GB kapaciteter. Drevet kan købes separat eller som en opgraderingsbundle med 2,5” USB 3.0 kabinet, 3,5” monteringskit, SATA data kabel, HDD kloningssoftware⁵, skruetrækker med flere bits og en adapter fra 7mm til 9mm højde. Drevet er allerede tilgængelig hos de fleste populære webshops.

[HyperX](#) er high-performance produktdivisionen hos Kingston Technology og har ansvar for højtstående DDR3 og DDR4 hukommelse, SSDer, USB drev og tilbehør til gaming. HyperX henvender sig til gamere, overclockere og entusiaster og er kendt for kvalitet, ydelse og innovation. HyperX støtter eSport og sponsorerer over 20 hold globalt og er hovedsponsor for [Intel Extreme Masters](#). HyperX kan besøges på events som [Dreamhack](#), [Brasil Game Show](#), [China Joy](#), [gamescom](#) og [PAX](#).

This SSD is designed for use in desktop and notebook computer workloads, and is not intended for Server environments.

1 Some of the listed capacity on a Flash storage device is used for formatting and other functions and thus is not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash memory Guide at kingston.com/flashguide.

2 Based on "out-of-box performance" using a SATA Rev. 3.0 motherboard. Speed may vary due to host hardware, software, and usage. IOMETER Random 4k Random Read/Write is based on 8GB partition.

3 Total Bytes Written (TBW) is derived from the JEDEC Client Workload (JESD219A).

4 Drive Writes Per Day (DWPD)

5 Operating system software support: Windows® 8.1, 8, Windows® 7 (SP1), Windows Vista® (SP2),

Windows XP (SP3)
