

# Gartner Positions Sims Recycling Solutions Again in the “Leaders” Quadrant of the Magic Quadrant for IT Asset Disposition, Worldwide

## Gartner Positions Sims Recycling Solutions Again in the “Leaders” Quadrant of the Magic Quadrant for IT Asset Disposition, Worldwide

Sims Recycling Solutions, a [leading provider of global IT asset disposal \(ITAD\) services](#) with 34 facilities on five continents, is honored to be positioned for the second year in a row by Gartner, Inc., the world's leading IT research and advisory company, in the “leaders” quadrant in its December 2014 Magic Quadrant for Worldwide IT Asset Disposition.

Gartner's report, “Magic Quadrant for IT Asset Disposition” by Rob Schafer, assesses 13 significant international vendors in the ITAD market that Gartner believes have the approximate size, capabilities, certifications and track record to meet potential clients' needs. These vendors are evaluated based on two categories: ability to execute and completeness of vision. Those placed in the “Leaders” quadrant are defined by Gartner as vendors “that execute well against a robust vision and are well-positioned for the future.”

“We believe our placement in the Gartner Magic Quadrant helps solidify our position as not just a leader in the electronics recycling industry but also as a leader in the ITAD industry,” stated Steve Skurnac, president of Sims Recycling Solutions. “Our large number of global clients takes solace in the independent assessment conducted by Gartner that we feel validates our ability to execute on a global scale. Coordinating our 34 sites on five continents has its challenges but the magic quadrant makes it clear that the coordination is succeeding.”

For organizations seeking ITAD services, a vendor's ability to execute and understanding of the market can be crucial to their success. The comprehensive research included in the 2014 Magic Quadrant for IT Asset Disposition, Worldwide report provides important insight to help IT executives get a head-start on their ITAD vendor selection.
