Volvo Trucks receives large orders from HayWay Group in the U.S. and Europe

Volvo Trucks has secured an order for 80 all-new Volvo VNL trucks from HayWay Logistics, marking their first deployment of trucks in the United States. Hayway Group has also ordered 150 FH Aero trucks from Volvo in Poland.

HayWay Group has placed large orders for Volvo trucks in the U.S. and Europe. The order for 80 VNLs marks the company's entry in the U.S. .

HayWay Group comprises 19 companies operating across Europe and the United States. The company has entered the U.S. market with a fleet consisting entirely of 80 Volvo VNL 860 sleeper trucks. The fleet will support long-haul, cross-country operations transporting general freight between Southern California and the state of New York for a major online retailer. The trucks will be serviced through Volvo's largest West Coast dealership group, TEC Equipment – Fontana.

HayWay Group plans to expand its fleet to 1,400 vehicles by 2029 in cooperation with Volvo Trucks and Volvo Financial Services, positioning the company as a growing logistics player in the U.S. market.

"HayWay Group's decision to enter the U.S. market with an order of 80 all-new Volvo VNLs is a bold move and a strong signal of confidence in our brand," said Peter Voorhoeve, president of Volvo Trucks North America. "The order builds on a long-standing relationship with Volvo Trucks in Europe and we are proud to partner with HayWay for their US expansion. HayWay's commitment to safety, innovation and long-term

growth aligns closely with how we support customers expanding into new markets.”

The HayWay Group has also placed an order for 150 Volvo FH Aero trucks in Poland via SIS Trans (SIS Sp. z o.o.), part of the HayWay Group.

“For me personally, this step represents the American Dream in action, building something new, taking smart risks, and investing for the long term,” said Artur Lewandowski, chief executive officer of HayWay Group. “We are known for being early adopters of technologies that improve safety and performance, and launching our U.S. operations with the Volvo VNL reflects that mindset. We trust Volvo based on years of experience in Europe, and starting with 80 trucks is a confident step toward building a strong, safe, and sustainable presence in the United States.”
