Swedbank Sustainable Bond Impact Report 2025

Swedbank grew its sustainable financing volumes in 2025. The bank's Sustainable Asset Register – comprised of green and social assets – amounted to SEK 165 billion by year-end 2025, an increase of 30 per cent compared to 2024.

“The continued growth of the Sustainable Asset Register demonstrates that supporting our customers in the sustainable transition is a business opportunity that also has a positive impact on society,” says Johanna Fager, Head of Sustainability at Swedbank.

The register's growth was primarily driven by green buildings, renewable energy and clean transportation, reflecting both structural investment needs and increased demand for energy efficiency and low-carbon solutions. The solid growth of the Sustainable Asset Register facilitated the issuance of six green bonds during 2025.

In 2025, the Sustainable Funding Framework was updated to ensure continued alignment with evolving market practices, current guidelines and regulatory expectations. The Framework is an integrated part of Swedbank's broader agenda to support the transition to a sustainable society.
