The Swedish Armed Forces chooses Knowit for upgrading systems for the Swedish Navy

Knowit has received an order for an upgrade of the command & control system previously delivered by Knowit in 2018. The upgrade encompasses increased functionality, FMN (Federated Mission Networking), and IT security solutions. The upgrade will also increase the possibilities for collaboration with Finland and NATO. The total value of the order (including options) is around SEK 70 million.

Knowit has been collaborating with the Swedish Armed Forces, the Swedish Defence Materiel Administration, and the defense industry for almost 30 years and has built up high competence and strong understanding of the specific requirements placed on development of new products and services in the defense sector.

“Today, we are very proud that Knowit has gained renewed confidence to support the Swedish Armed Forces in developing the possibilities for collaboration with Finland and NATO. This feels particularly important given the uncertain state of affairs we are currently living in. This deal is further confirmation of our position on the market in the defense sector,” says Mats Thorstenson, CEO of Knowit Dataunit.

The upgrade of the previously delivered systems will be performed in collaboration with Knowit’s Finnish partner Navielektro, which delivers the subsystem MATIS.

About Knowit
We are digitalization consultants and a Nordic powerhouse for the digital business models of the future. Our vision is to create a sustainable and humane society through digitalization and innovation. Knowit supports its clients in the digital transformation and stands out among other consultancy firms through its decentralized organization and agile work methods in client assignments. The operations are divided into four business areas – Solutions, Experience, Connectivity, and Insight – which offer services in bespoke system development, digital customer experiences, the internet of things, cloud, cybersecurity, and management consultancy. Competences from several business areas are often combined in client projects.

Knowit was founded in 1990 and has around 3,800 employees, mainly in the Nordic countries, but also in operations in Germany and Poland. Knowit AB (publ) has been listed on the stock market since 1997 and is currently listed on Nasdaq OMX Stockholm Mid Cap. For more information about Knowit, please visit knowit.eu.
