

Thermaltake and Asetek Partner on New Floe Riing RGB Product

Asetek today announced that Thermaltake has selected Asetek's liquid cooling technology for its new Floe Riing RGB TT Premium Edition All-in-One Cooler Series.

"We are excited to work with Thermaltake again on their new product. Our partnership has progressed over the years and we have been able to be a key player for Thermaltake, helping them achieve their product goals," said John Hamill, Vice President of WW Sales and Marketing.

"At Thermaltake we believe that a great product is always behind a good brand – the better the product the better the brand. Liquid-cooling products play an important role in our product portfolio. We applied the latest technology to develop the Floe Riing RGB TT Premium Edition Series in addition to the unique LED waterblock and the high efficiency radiator design," said Kenny Lin, Thermaltake CEO and Chairman Particularly.

[Thermaltake](#) is known for their wide offering of products in the DIY-gaming industry. Read more about the new Floe Riing RGB TT Premium Edition All-in-One Cooler Series on [Thermaltake's Computex microsite](#) and on [Asetek.com](#).
