

## Asetek receives incremental order for government contract

Aalborg, Denmark, 12 July 2017 – Asetek today announced an increase of its contract with the United States Department of Defense (DoD) Environmental Security Technology Certification Program (ESTCP).

Asetek's contract with the DoD, initiated in [October 2013](#), is focused on studying the benefits of Asetek's RackCDU Direct-to-Chip (D2C) liquid cooling technology in a DoD data center.

This amendment supports installation of our In-RackCDU product line at a new site: One of DoD's largest HPC data centers.

The DoD has therefore increased contract funding by USD 1.2 million to a total value of USD 3.7 million. The incremental funds are expected to be spent over the coming three quarters. The program is extended through May 2018.

### **About Asetek**

Asetek is the global leader in liquid cooling solutions for data centers, servers and PCs. Founded in 2000, Asetek is headquartered in Denmark and has operations in California, Texas, China and Taiwan. Asetek is listed on the Oslo Stock Exchange (ASETEK.OL).
