

Asetek – Update to Q2 and Full Year 2018 Desktop Revenue Guidance

June 15, 2018 – Asetek communicated in its first quarter 2018 report announced 25 April 2018 that the company expected revenue growth in the second quarter of 2018 for the desktop segment to exceed 50% over the same period in 2017, and that full year 2018 desktop revenue growth was expected to be in the range 10% to 20% over 2017.

The company today announces that due to continued positive development within Asetek's desktop segment, the company has increased its second-quarter desktop segment revenue-growth expectation to at least 75% over the same period in 2017. The full year 2018 desktop segment revenue growth guidance has been increased to between 15% and 25% over 2017.

Demand for Asetek's desktop products was positively affected in the second quarter of 2018 by strong demand in gaming and e-sports combined with successful launches of new desktop products and partners, and subsequent shipments to stock the distribution chain.
