

## Asetek Announces Expectations for 2026

In October 2025, Asetek secured a major long-term liquid cooling agreement with a global leading provider of high-quality PC gaming components, including a minimum revenue commitment of USD 35 million over the first two-year term. This agreement strengthens revenue visibility and supports Asetek's expectation of renewed growth beginning in 2026. In SimSports, the Company plans to launch its console-compatible products in 2026. As a result of these prospects, the Company expects revenue for 2026 at the Group level to be in the range of \$55 to 60 million, with an adjusted EBITDA of approximately zero.

The Group revenue outlook is derived from expected revenue in the Liquid Cooling segment in the range of \$44 to \$48 million, and in the Sim-Sports segment \$11 to \$12 million. For the full fiscal year 2026, the Liquid Cooling segment is expected to achieve a gross margin in the range of 35-40%, while the SimSports segment is expected to reach a gross margin of 28–32%. The potential impact of the geopolitical situation and U.S. import tariffs remains uncertain and will depend on various factors beyond the Company's control, as well as the Company's ability to mitigate any potential effects.
