

Asetek Receives its First Production Order of RackCDU From Fujitsu

April 22, 2015 – Asetek® announced today that it has received its first production order for its RackCDU Direct-to-Chip™ data center liquid cooling system under the [previously announced OEM purchase agreement with Fujitsu](#). With a value in excess of \$550K USD and approximately 40 racks worth of cooling, including more than 5000 pumps and loops for CPU, GPU and memory, it is the largest single order Asetek has received so far on its RackCDU products. Delivery and revenue is currently scheduled for Q2.

*“The official launch of **FUJITSU Cool-safe®** products based on RackCDU is scheduled for Q3 so it is great to see the first order already now. Furthermore Fujitsu [just won an award on its PRIMERGY servers with Asetek’s liquid cooling](#)”.*

“This order substantiates the impact of our milestone partnership with Fujitsu and further validates our strategy of cooling data centers through top tier OEMs,” said André Sloth Eriksen, Founder and CEO of Asetek”.

RackCDU is Asetek’s innovative hot water, direct-to-chip, data center liquid cooling technology, which removes heat from CPUs, GPUs, memory modules and other hot spots within servers, using an all-liquid path and rejecting the heat into ambient outdoor air without chilling. As validated by Lawrence Berkeley National Labs, RackCDU enables cooling savings in excess of 50%, density increases of 2.5x to 5.0x, and recovery of all the server energy removed by RackCDU for reuse in facility heating and cooling.

About Asetek

Asetek is the world leading provider of energy efficient liquid cooling systems for data centers, servers, workstations, gaming and high performance PCs. Its products are used for reducing power and greenhouse emissions, lowering acoustic noise, and achieving maximum performance by leading OEMs and channel partners around the globe.

Asetek’s products are based upon its patented all-in-one liquid cooling technology with more than 2 million liquid cooling units deployed in the field. Founded in 2000, Asetek is headquartered in Denmark with offices in California, China and Taiwan. For more information, visit <http://www.asetek.com>.
