

## Asetek – Receives Order for Largest Server Installation to Date

**October 13th, 2015** – Asetek® announced today that it has received a purchase order for its RackCDU™ data center liquid cooling system placed by an undisclosed Original Equipment Manufacturing (OEM) partner. The order for 21 RackCDU with Direct-to-Chip™ cooling loops is to satisfy an undisclosed OEM customer installation. Both the OEM and the end user will be announced when the information becomes public.

Asetek expects future orders with this customer to result in more than 100 RackCDU with cooling loops for more than 6,000 compute nodes within the first 12 months of production and over 300 RackCDU within the first 3 years of production. The order and OEM relationship is anticipated to result in between \$1.0M and \$1.5M of revenue within the first 12 months. Production to fulfill the order is expected to start within the next few months.

“We are excited about the opportunity to demonstrate our capabilities on such a large scale,” said André Sloth Eriksen, Founder and CEO of Asetek. “Although this is just the first order, it is a strong validation of our value proposition to data centers worldwide.”

### **About Asetek**

Asetek is the world leading provider of energy efficient liquid cooling systems for data centers, servers, workstations, gaming and high performance PCs. Its products are used for reducing power and greenhouse emissions, lowering acoustic noise, and achieving maximum performance by leading OEMs and channel partners around the globe.

Asetek’s products are based upon its patented all-in-one liquid cooling technology with more than 2 million liquid cooling units deployed in the field. Founded in 2000, Asetek is headquartered in Denmark with offices in California, China and Taiwan. For more information, visit <http://www.asetek.com>
