

New cost-efficient Q8 Baroni metalworking fluid from Q8Oils combines multi-metal compatibility with machine-material versatility

Leeds, UK – Tuesday, 16 July 2013 – Kuwait Petroleum International Lubricants ([Q8Oils](#)) has introduced Q8 Baroni XUP, an ‘Ultra Performance’ soluble cutting fluid specially formulated to be cost-effective in arduous machining operations using the most demanding materials.

Commenting for Q8Oils, Mick Doxford says the new semi-synthetic, chlorine- and boron-free [Q8 Baroni XUP](#) features a unique combination of synthetic lubricity additives that provides outstanding performance in operations where conventional fluids will fail. He adds that the unique lubricity additives significantly reduce long-term costs by improving machining efficiency, minimising reject rates and providing an overall reduction in tooling costs.

This also means that in severe situations where neat cutting oils would normally be specified, rationalisation is feasible without compromising surface finish or tool life. With outstanding wetting and detergency characteristics, Q8 Baroni XUP ensures excellent tramp oil rejection to provide fluid stability and long sump life in soft and hard water areas. It also minimises residue build-up in hard water areas. These features also combine to provide very real operator benefits by improving visibility and helping to create a much cleaner, healthier working environment.

Designed for a wide range of machining operations, including milling, turning, drilling and deep-hole drilling, threading, reaming and broaching; Q8 Baroni XUP is ideal for arduous machining applications using materials such as yellow metals, high-tensile steels, stainless steels, aluminium alloys, titanium and heat resistant alloys.

Q8 Baroni XUP’s unrivalled combination of multi-metal compatibility and machine-material versatility is reinforced with a highly-effective, anti-corrosion package ensuring maximum protection to machine tools and components.

In addition, a highly stable micro-emulsion formed by Q8 Baroni XUP, extends fluid life and minimises the need for fluid changeover, helping to further reduce overall fluid costs. Its low-foaming properties also minimises spillages and, being free from chlorinated paraffins, requires no environmental labelling.

Note to Editors:

Q8Oils is part of Kuwait Petroleum International Lubricants. It has a unique, innovative and progressive approach when it comes to producing some of the World's finest quality lubricants. Manufactured in its plant in Leeds, Q8Oils represent the very best and latest in lubricant technology and delivers this direct to customers across the Industrial and Automotive sectors.

For Q8Oils sales phone: +44 (0)113 236 5204 or email: Marketing@Q8Oils.com

Q8 Oils offers a comprehensive lubrication solutions range in the following products:

- Passenger car engine oils
- Commercial vehicle engine oils
- Marine engine oils
- Outboard engine oils
- Motorcycle engine oils
- Automotive transmission and axle oils
- Universal transmission oils
- Gas engine oils
- Food grade lubricants and greases
- Hydraulic fluids
- Plant maintenance oils
- Demoulding oils

- Quenching oils
- Process oils
- Neat cutting oils
- Neat forming fluids
- Soluble metal working fluids
- Heat transfer fluids
- Greases
- Extensive range of ancillary products
