Comments by the President and CEO

Strong recovery in the quarter

The outbreak of Covid-19 has impacted our lives and how we do business. I am pleased that all our efforts have resulted in a significantly improved result compared to the previous quarter. Compared to the same quarter last year, our organic growth declined by 5%, currency effects were negative at -7%, while acquired growth was positive at 4%. Total sales declined by 8%. But the quarter has seen a strong recovery in all divisions (especially in EMEA), with the slowest recovery in Global Technologies which continues to be affected by Covid-19 in its main customer segments.

Operating income, including divestment gains of SEK 252 M, was SEK 3,593 M and the corresponding margin recovered strongly in the quarter to 16.2%. Significant cost-saving measures have been implemented, partly offsetting the lower volumes. We continued to generate a very strong operating cash flow of SEK 4,407 M and the cash conversion in the quarter was at 129% (121). As a result of the improved financial performance, the Board of Directors has decided to propose a second dividend of SEK 1.85 making the total dividend SEK 3.85 as originally proposed at the beginning of the year before the outbreak of Covid-19.

Strong performance in a difficult world

The quarter continued to be impacted by Covid-19, but most of our important markets showed good recovery. In particular, the markets in Europe recovered faster than in the US, as lockdowns were eased and distributors started to restock. In Asia, China continued to improve, but South Korea and South Asia remained weak. Some customer segments are still impacted by lower mobility and this has negatively affected several business areas in Global Technologies. Entrance Systems continued to improve its performance and reported positive organic growth while we also welcomed agta record into the ASSA ABLOY family.

We have continued to implement significant cost-saving measures with a focus on long-term cost reductions. This unfortunately means we had to reduce the number of employees in the Group and we are cutting costs in all areas except product development and strategic growth areas. In total, these actions have reduced our SG&A and conversion expenditures by around SEK 0.6 billion net during the quarter. In addition, we will be launching another restructuring program, MFP8, in the fourth quarter. The program will have a payback period of about two years, will include the closure of 9 factories and more than 30 offices and will generate annual savings of close to SEK 0.9 billion in 2023.

Covid-19 is continuing to impact our business negatively and we will therefore continue to focus on cost measures, while also investing in growth initiatives that can compensate for the sales declines caused by Covid-19.

Finally, I would like to announce that we are launching a new sustainability program with ambitious targets for 2025 and that we are committing to the science-based targets climate initiative, which aligns us with the Paris Agreement. This demonstrates our desire to lead our industry towards a more sustainable future, and will further improve our competitiveness through sustainable products, solutions and operations.

Accounting principles

ASSA ABLOY applies International Financial Reporting Standards (IFRS) as endorsed by the European Union. The same accounting and valuation principles as in the latest Annual Report have been applied. This Report was prepared in accordance with IAS 34 'Interim Financial Reporting' and the Annual Accounts Act. The Report for the Parent company was prepared in accordance with the Annual Accounts Act and RFR 2 'Reporting by a Legal Entity'.

ASSA ABLOY makes use of a number of financial performance measures that are not defined in the reporting rules that the company uses – so-called 'alternative performance measures'. Risks and uncertainty factors

ASSA ABLOY is an international Group with a wide geographical spread, involving exposure to various forms of strategic, operational and financial risks. Strategic risks refer to changes in the business environment with potentially significant effects on ASSA ABLOY's operations and business objectives. Operational risks comprise risks directly attributable to business operations, entailing a potential impact on the Group's financial position and performance. Financial risks mainly comprise financing risk, currency risk, interest rate risk, credit risk, and risks associated with the Group's pension obligations.

Risk-taking in itself provides opportunities for continued economic growth, but naturally the risks may also have a negative impact on business operations and company goals. It is therefore essential to have a systematic and efficient risk assessment process and an effective risk management program in general. The purpose of risk management at ASSA ABLOY is not to avoid risks, but to take a controlled approach to identifying, managing and minimizing the effects of these risks. This work is based on an assessment of the probability of the risks and their potential impact on the Group.

The Covid-19 pandemic has had a substantial business impact on ASSA ABLOY during 2020. The continued impact of the pandemic on the business is difficult to predict due to the uncertainty of market conditions but the health and safety of our employees remain our first priority.

For a more detailed description of particular risks and risk management, see the 2019 Annual Report.
