

## **Autoliv Joins Together for Safer Roads' Global Leadership Council for Fleet Safety**

Makes Commitment to Safer Cities Micromobility Research Project and Fleet Safety

**(Stockholm, Sweden, February 25, 2020) Autoliv Inc. (NYSE: ALV and SSE: ALIVsdb), the worldwide leader in vehicle safety systems, today announced that it has joined Together for Safer Roads (TSR), a coalition of leading private sector companies dedicated to preventing traffic crashes, injuries and deaths on roadways around the world. Specifically, Autoliv will be an integral member of the coalition's Global Leadership Council for Fleet Safety, a TSR program that uses peer-to-peer knowledge-sharing to help smaller fleet operators create safety cultures and reduce risk.**

According to UN data, an estimated 1.35 million people are killed every year in road crashes and up to 50 million more are injured. This costs the global economy \$1.85 trillion. TSR is advancing road safety with actionable campaigns and programs, including safer fleets, safer cities, and data and digital innovation. Forward-thinking companies like Autoliv are joining the cause because of their actionable commitment to road safety improvement and technology to prevent crashes, injuries and deaths.

"Together for Safer Roads recognizes that safer roads are a shared responsibility and we are happy to join their network of companies actively working to make roads safer for all people and to jointly research new safety innovations," said Cecilia Sunnevang, Autoliv Vice President of Research.

Autoliv will specifically participate in TSR's Safer Cities micromobility risk management project and lead safety research into the growing e-scooter and micromobility market segment and they will participate in TSR's Global Leadership Council for Fleet Safety that is focused on supporting fleets with access to peer advisors, training experiences and organizational development to establish a safety culture and create positive change.

"Focusing on how we can make tomorrow's mobility safe and pursuing a common way of defining safe driving and how driving data can be used to promote this, sets the agenda for leading companies to collaborate in this space," said Christoffer Malm, Autoliv Director of Digital Business and Mobility.

"Traffic deaths continue to be an epidemic and working with partners like Autoliv is a crucial component in our effort to keep all road users safer," said David Braunstein, President, Together for Safer Roads. "Autoliv's knowledge and data-driven expertise in creating safety systems will provide a positive impact toward reducing the curve on road traffic collisions so they are no longer one of the leading causes of death and injuries worldwide."

### *About Together for Safer Roads*

Together for Safer Roads is a global NGO that works with government, businesses and community stakeholders on local projects, fleet safety management and technology initiatives to prevent traffic crashes, injuries and deaths. TSR was started in conjunction with the UN's Decade of Road safety and has partners around the world. TSR's members include AB InBev, AIG,
