

## DigiPlex lists largest ever Nordic data centre bond on the Oslo Stock Exchange

Oslo, 22 October 2019 – **DigiPlex**, the Nordic leader for innovative, sustainable and secure data centers, issued a substantially oversubscribed NOK 1.80 billion senior secured bond in April. Today, the bond was listed on the Oslo Stock Exchange.

Byrne Murphy, Co-owner and Chairman of DigiPlex, said: *"The strong investor interest, substantial oversubscription and the healthy trading development post issuance is a clear testament to the strong credit story and track record of DigiPlex built over almost two decades of operations. The market is clearly very receptive to profitable growth, high customer retention, leading market presence and a high-quality management team - we will continue to assess future financing options to fuel our growth."*

Gisle M. Eckhoff, CEO of DigiPlex, said: *"We see an incredible growth potential in the Nordic region driven by both international demand and Nordic enterprises moving their digital infrastructure from on-premise solutions into combinations of colocation and cloud. DigiPlex is very well placed to capture these exciting market opportunities."*

The bond issue follows a number of recent initiatives taken by DigiPlex to strengthen its market-leading position in the Nordic region. DigiPlex recently **announced two additional sites in Norway** to meet international demand for cost effective and green Nordic data center capacity. Earlier this year, DigiPlex launched its **Nordic Connect Platform**, linking its main data centers in Norway, Sweden and Denmark, to create a unique cross-border eco-system. This followed progress in 2018 which saw the company expanding **two of its data centers in Oslo**, and entering the Danish market with the acquisition of a **Telia data center in central Copenhagen**. In the recent past, DigiPlex has secured several major new customers including **Microsoft**, **AWS**, **Iver (formerly known as Candidator)**, and **NetNordic**. Investments in innovation, environmental sustainability and a transformation of its brand have seen DigiPlex win a number of awards including **"Best Data Centre Energy Solution"**, **"Data Center Operations Team of the Year - Colo + Cloud"**, and the prestigious title **"Renewable Energy Technology of the Year"**. DigiPlex is **the most recognized data center brand amongst the Nordic C-Suite**, and a certified **'Great Place to Work'**.

**About DigiPlex**

DigiPlex is the Nordic region's best recognized, data center provider. The privately-owned company designs, builds and operates sustainable and secure data centers across the Nordics, including Edge locations in Oslo, Stockholm and Copenhagen. Offering best-in-class services with the highest possible availability, DigiPlex is an ideal partner for international businesses looking to access the compound regional advantages of the Nordics: low cost of power, a naturally cool climate, stable political landscape and some of the world's best technology, expertise and infrastructure.

DigiPlex is carrier-neutral and offers connectivity to all major Cloud and Network Service Providers, granting comprehensive access to the complete Nordic digital eco-system. With significant space for expansion across the Nordic region, DigiPlex is a trusted partner for businesses of all sizes, including those with mission-critical applications. All five of DigiPlex's data centers are powered by electricity produced from 100% sustainable sources and the company has won several awards for its many energy efficient innovations and sustainability initiatives.[www.digiplex.com](http://www.digiplex.com)
