Letter to the shareholders

” Our growth in Light Packaging and the recovery of the Envelope market are giving us tailwind in passing on necessary price increases in the upcoming months, says Bong’s CEO Kai Steigleder. ”

MARKET AND INDUSTRY

The new rise in infection rates in many countries and ongoing restrictions on economic activity resulted in an economic situation that was still very fragile in the second quarter. In addition disruptions in supply chains and drastic price increases in most of Bong’s raw materials such as paper, window film, ink, adhesives, plastics etc. had a negative impact on our business.

Especially important and still ongoing in the coming months are the large price increases on paper which were triggered by historically high pulp cost in combination with a strong reduction in available paper production capacity due to mill closures. In order to compensate for this and to reflect the new situation Bong has decided to increase its own prices to the market. This has been done partly in the second quarter but the majority will be done in Q3 2021 and will be on both Envelope and Light packaging products.

Light Packaging

The development of Bong’s Light packaging sales in Q2 was positive with an overall currency adjusted increase of 19% compared to Q2 2020. The overall currency adjusted year to date increase amounts to 18% partly fostered by the rise in E-Commerce.

This ongoing very positive development in Q2 was mainly driven by increased sales of our new e-Green product range and the continuous growth of our Bubble Mailers but also other products of our own production like Board Backs, All board envelopes and Paper Carrier Bags contributed positively to the strong sales development.

We are very confident for the second half of 2021 because the strongest months in our Retail division are just lying ahead of us. In addition we will profit with our new e-Green range from the very strong demand in highly adapted, ecological packaging for e-Commerce. Therefore we continue to invest into this future oriented market segment in 2021 and 2022.

Envelope

Bong’s Envelope sales in Q2 increased currency adjusted by 6% compared to Q2 2020 but Q2 2020 was affected extremely negatively by the Covid-19 pandemic. The overall currency adjusted year to date Envelope sales decreased by 5%.

The development of envelope sales is following the negative long-term trend.

OPERATING PROFIT

The Group’s currency-adjusted sales increased by 9% compared with Q2 2020 as Q2 2020 was affected extremely negatively by Covid-19 effects. Bong’s gross margin has increased compared to Q2 2020 mainly because of better product mix. Operating profit increased to SEK 2 million (-20) and the efforts to lower the breakeven point of the Group are becoming increasingly visible. The operating profit in Q2 2021 was only marginally affected negatively by restructuring cost SEK (4) million and it was not affected by impairment of Goodwill SEK (4) million.

CASH FLOW AND REDUCED ADJUSTED NET DEBT / ADJUSTED EBITDA

Cash flow from operating activities amounted to SEK 29 million (18). Adjusted net debt / adjusted EBITDA according to Bong’s Bond loan amounts to 1.57.

FOCUS AND STRATEGY

Our growth in Light Packaging and the recovery of the Envelope market are giving us tailwind in passing on necessary price increases in the upcoming months.

Bong will further invest in its Light packaging production capacity and our goal is to generate the main part of our sales with Light packaging products latest in 2025.

The refinancing process of the senior secured bonds with due date in October 2021 is still ongoing but is estimated to be completed beginning of Q3 2021.

Last but not least I am particularly thanking all our hard working and dedicated employees as well as our stakeholders and shareholders for their support.
