IRISITY

Pressrelease 2019-05-02

About Irisity

Irisity AB (publ) is a leader in intelligent camera surveillance. Using AI and proactive, self-learning algorithms, we upgrade both existing and new surveillance cameras and monitoring systems from passive to proactive alarming devices. IRIS™, Irisity's SaaS solution, turns attention on true events rather than false alarms. Irisity's high-precision AI algorithms detect human activity at long distances during all light conditions down to 10 pixels only.

IRIS™ currently serves a wide range of security applications for hundreds of clients throughout Scandinavia; including schools, overnight monitoring of the elderly in their homes, car parks, critical infrastructure and various types of protective areas.

Irisity act in a turbulent world in which surveillance sentiment has transformed from being questioned as an integrity threat to an obvious safety factor. Through an ambitious growth strategy in one of the world's largest and most rapidly expanding industry sectors, we are investing in new innovation and expanding our IRIS™ SaaS offer internationally.
