## **Mindmancer and Responda 113 signs partnership agreement**

**Mindmancer and the alarm receiving center Responda 113 in Finland have signed a partnership agreement. 113 will receive and evaluate alarms in Mindmancer's alarm central network and manages centralized alarm handling and facility management for European markets. The process of alarm handling includes incident confirmation and dispatching of appropriate response in most cost efficient and suitable manner.**

– The agreement with 113 is a direct result from our partnership work during the last year. 113 will be handling alarms for Finnish partner Turvatiimi. The partnership also opens possibilities to deliver alarm services to countries in Europe where 113 and Mindmancer could grow together, says Richard Radomski, Partner manager at Mindmancer AB.

– We are very enthusiastic about the Mindmancer technology, which enables visual real time alarm monitoring and immediate preventive actions. The service is available twenty-four hours a day without being dependent on the location of monitored subjects or areas, says Petri Kokkonen, CEO at Responda 113. This service is cost efficient and absolutely perfect for building sites security, large areas that need high security, and public areas such as schools and churches.

### **Responda 113**

Responda 113 offers around the clock control room, camera surveillance, alarm receiving center and command center services for both the private and public sectors. 113 utilizes the latest technology based on the Insta Response system produced by Insta Defsec. Responda 113 offers monitoring services against cyber threats and machine monitoring globally. The customer service center of 113 is at your service round-the-clock, every day of the year, all over the world.

*Mindmancer erbjuder en komplett kameralösning med fokus på att täcka stora områden med så få kameror som möjligt. Man skulle kunna säga att vi säljer väktare – fast lite smartare. Med intelligenta kameror uppkopplade till larmcentral klarar vi av att vakta flera byggnader, anläggningar och skolor samtidigt – till en bråkdel av kostnaden jämfört med traditionella väktartjänster. Både smartare och bättre tycker vi. Våra kameror lämnar aldrig området.*
