

## iMessageo Personal App Massager Seeks Source Funding through Indiegogo Campaign

*Revolutionary wellness technology iMessageo reinvents the personal app massager*

Dallas, Texas – April 22nd 2015 – Liran Grenwald and Kobi Asseo, developers of the iMessageo Personal App Massager, are finalizing the details of the company's crowdfunding campaign launched on April 16th 2015. The crowdsourcing campaign on Indiegogo ([https://www.indiegogo.com/command\\_center/imessageo-the-first-app-massager](https://www.indiegogo.com/command_center/imessageo-the-first-app-massager)) will be conducted through funding hub Indiegogo. Source funding for the iMessageo campaign will be used to market their proprietary new app massager worldwide.

The iMessageo Personal App Massager, created using transcutaneous electrical nerve stimulation technology, produces electric current stimulation to nerve endings for therapeutic relief. "We feel it's important to relax and enjoy the small moments in life, so we wanted to create something that will make a difference," say Messageo Ltd Co-Founder Liran Grenwald. The idea for the breakthrough device came from the Technology of the Tens unit. TENs devices use chiropractic and physical therapist techniques for pain relief and muscle relaxation. The design of the model is revolutionary. It is constructed using high-quality materials, but the device is still small, lightweight, and powerful. Despite size, it is constructed to deliver a full massage experience.

The iMessageo Personal App Massager features a lithium rechargeable battery that can be recharged using a standard wall outlet or USB cord. The unit is outfitted with a variety of treatment options ranging from acupressure to muscle relaxation. Users will find that the device is easy to use and can be controlled from a mobile device.

The iMessageo Personal App Massager is truly a mobile device as it is complimented by a downloadable and easy to use mobile application. The iMessageo personal massager has two outlets that expand up to 4 massage pads at once; a standard device offers an XL pad and 4 regular pads. iMessageo is backed by a lifetime warranty and a worldwide customer service plan.

The device caters to a large demographic, and consumers range from physically active individuals to pain sufferers. Target users will find benefit from massage therapy that alleviates soreness and promote muscle relaxation. The portability and convenience offered by the iMessageo Personal App Massager will modernize pain therapy and tissue massage for years to come.

For more information about Messageo or iMessageo, please contact Liran Grenwald or Kobi Asseo through the company website [www.iMessageo.com](http://www.iMessageo.com).
