

The new Planmeca Romexis® 6.0 highlights usability and streamlines workflows

*Planmeca is proud to announce a renewed version of its groundbreaking all-in-one software, **Planmeca Romexis®**. The new version of the software introduces an improved user interface with even better usability as well as a wide selection of new tools and features.*

The **Planmeca Romexis® 6.0** software solution provides versatile tools for all imaging needs, from efficient day-to-day imaging to advanced diagnosis and treatment planning. Version 6.0 features a modern look and feel that highlights usability. The easy navigation with fewer clicks and a customisable user interface streamlines the workflow. In addition, Romexis 6.0 has flexible workflow wizards, which makes using the software easy and enjoyable from day one.

Planmeca Romexis 6.0 also offers several additions to the tool selection. The new **Planmeca Romexis® CMF Surgery** module enables fully digital orthognathic surgery planning, splint design and soft tissue simulation. The **Planmeca Romexis® Implant Guide** module has been upgraded with a virtual tooth extraction feature, and the **Planmeca Romexis® Smile Design** module with AI-based automatic image cropping and orientation as well as improved photorealistic simulations. The Romexis 6.0 3D module also offers AI tools as add-on features, which are used e.g. for automatic nerve canal tracking as well as automatic tooth segmentation from the CBCT image.

“The Planmeca Romexis software is a perfect companion to Planmeca’s equipment, providing the smoothest workflow for image acquisition, diagnosis and treatment planning. As an open software platform, Romexis is also capable of storing and viewing images from 3rd party devices, which means unforeseen flexibility and freedom. With a new, beautiful user interface and improved usability, working with Romexis 6.0 is enjoyable – it simply makes your work flow,” states **Helianna Puhlin-Nurminen**, Vice President of Digital Imaging and Applications at Planmeca.

Planmeca Romexis is the first dental software in the world to combine 2D and 3D imaging as well as the complete CAD/CAM workflow. It is a uniquely comprehensive platform for the needs of all dental professionals from smaller to larger clinics, making their daily workflow faster and smoother.

Planmeca will be presenting Planmeca Romexis 6.0 at IDS 2019.
