

Planmeca ProMax® 3D Classic, Mid and Max devices now certified for use with suresmile

Planmeca and OraMetrix/suresmile are pleased to announce that **Planmeca ProMax® 3D Classic**, **Planmeca ProMax® 3D Mid**, and **Planmeca ProMax® 3D Max** imaging units are certified for use with suresmile by OraMetrix.

suresmile is designed to enable orthodontists to visualize and simulate multiple diagnostic set-ups and design customized archwires for every patient. The accuracy of the patient scans plays a critical role in maximizing the effectiveness of the system.

“The superior performance of Planmeca ProMax 3D imaging units makes them an excellent fit with suresmile and a valuable addition to the imaging technology of suresmile practices,” said Phil Getto, Chief Technology Officer for OraMetrix.

Planmeca ProMax® 3D is a product family consisting of exceptional all-in-one imaging units. With up to five different imaging modalities these intelligent products can meet all modern maxillofacial imaging needs. Planmeca ProMax 3D units also offer a unique Planmeca Ultra Low Dose™ imaging protocol, enabling CBCT imaging with an even lower effective patient dose than standard 2D panoramic imaging.

“We want patients to benefit from most technologically advanced orthodontic care available. The suresmile certification for Planmeca ProMax 3D imaging units helps us to ensure that doctors have the best possible orthodontic tools to work with,” said Timo Müller, Vice President of X-ray division for Planmeca Oy.
