

aXichem receives orders for aXivite from BART in Poland, for continued manufacturing of weight control product

[aXichem AB](#) (publ), a developer of innovative natural analogue ingredients for the dietary supplement market, announces that the company has received new orders for its phenylcapsaicin product aXivite® from the Polish distributor [BART](#). The ordered volume will be used in continued production of the product for weight control that was launched last year. The total order value amounts to approximately SEK 400,000.

"BART is one of our most active distributors in Europe and with only a few weeks apart, two new orders have come in for aXivite for continued production of a valued consumer product for weight control. BART recently represented aXichem at Vitafoods Europe in Switzerland and presented aXivite there in the very best way. It is very inspiring to see the increased interest in phenylcapsaicin and how well the extraordinary data published in [Journal of the International Society of Sports Nutrition \(JISSN\)](#) and [Frontiers of Physiology](#) have been well received by the market", says Torsten Helsing, CEO of aXichem.

About BART

BART is a Polish producer of natural colors, flavors, emulsions, and liposomal vitamins (liposomal encapsulation technology of microscopic, healthy fat particles, consisting of phospholipids, together with water-soluble vitamins and minerals). BART also offers coloring foodstuffs, coloring blends and a wide range of ingredients, including botanical extracts, for different food sectors. aXichem has a collaboration regarding the distribution and sale of aXivite® with BART since 2020.

About phenylcapsaicin and aXivite®

aXichem's proprietary molecule, phenylcapsaicin, combines the naturally occurring phenyl group with capsaicin, connected by a triple bond. The result is an innovative natural analog capsaicin with high purity, which in several studies has been shown to have the same health-promoting properties, as well as some unique benefits, as natural capsaicin. Phenylcapsaicin is approved under Novel Food in the EU and GRAS Food in the USA and is marketed for dietary supplements and functional foods under the brand name aXivite.
