aXichem confirms shipment of first call-off order for aXiphen® to Chr. Olesen in Brazil following successful scale-up of production

[aXichem AB](#) (publ), (aXichem), the developer of innovative feed additives and food supplement ingredients, confirms the shipment the first call-off order for aXiphen® to its distributor in Brazil, [Chr. Olesen](#). The order was announced in May 2025 and is called-off from the in February communicated order of approximately SEK 7 million. The value of this first call-off order amounts to approximately SEK 1.6 million. In connection with this delivery, aXichem has successfully completed an upscaled production of aXiphen®, which enables shorter lead times for upcoming shipments. The process quality has also been confirmed, ensuring consistency and reliability in future deliveries.

Torsten Helsing, CEO of aXichem, comments:

“The first delivery from the call-off order to Chr. Olesen in Brazil is a tangible result of our commercial efforts and an important step in establishing our presence in the market. Thanks to the successful scale-up of production, we are now able to maintain inventory, allowing future deliveries to be made directly from stock. This strengthens our ability to respond quickly to market demand and supports our continued growth.”

About Chr. Olesen

As a global distributor in the animal health and nutrition industry, Chr. Olesen is committed to delivering high-quality, safe, and sustainable solutions, contributing to the advancement of the animal production sector.

About phenylcapsaicin and aXiphen

The health benefits of chili peppers and their active ingredient capsaicin have been known for centuries. aXichem's proprietary molecule, phenylcapsaicin, combines capsaicin with a phenyl group. The result is an innovative substance with completely unique properties. As an ingredient in chicken feed, phenylcapsaicin is now a non-antibiotic alternative that inhibits salmonella, improves animal health and increases productivity.

Production trials conducted in Brazil 2025 confirm previous production trials and studies conducted in Europe, which proved the effectiveness of aXiphen® as an ingredient in poultry feed. The production trial in Europe included approximately 1.6 million birds and showed, under the test conditions and when 15 ppm phenylcapsaicin was added to the feed, a statistically significant reduction in the number

of farms with salmonella-positive floor tests. The European Production Efficiency Model, EPEF, also showed that breeding efficiency increased by 14% compared to traditional feeding.

The information was submitted, through the provision of the specified contact person, for publication on 17 September 2025, 08:30 AM CET.

About aXichem

aXichem develops, patents and markets industrial chemicals. The company's first product is phenylcapsaicin, which is commercialized under two brands, aXiphen® and aXivite®, as an ingredient in animal feed and dietary supplements, respectively. The business is divided into three market areas with different applications for phenylcapsaicin: as an ingredient in feed for poultry, such as chicken and turkey; as an ingredient in food supplements for gut health, weight control and sports and exercise; and as an ingredient in food supplements for the bio-enhancement of curcumin and melatonin. aXichem is listed on the Nasdaq First North Growth Market. Certified advisor for aXichem is Västra Hamnen Corporate Finance AB. More information is available at www.axichem.com.
